RULES

APPLICATION OF RATES - GENERAL:

RULE 160

- A. Except as otherwise provided, this tariff applies to the transportation of General Commodities in AQ, LCL, CL or Volume quantities via routes provided in Rule 875.
- B. The carrier reserves the right, when because of traffic congestion or other causes or conditions beyond carrier's control, to forward traffic via any routes over the routes of carriers concurring herein.
- C. Rates named herein apply via a combination of motor-water-motor routes, except as otherwise may be provided.
- D. Freight to or from ports named herein will be accepted and handled direct only when carrier feels the quantity offered is sufficient to justify the expense of the call.
- E. Freight that is charged on a per linear or square foot basis will have its measurements rounded up to the next whole foot. Fractions of feet will not be used when calculating the charges.
- F. Freight loaded to containers or platforms, or any other equipment style, under shipper load and count conditions, will move at AQ, CL or Volume rate at the appropriate rate in the prevailing tariff.
- G. Where rates are determined by measurement or weight, (other than per linear foot or square foot see (E) above) measurement will be rounded to the whole foot and weight will be rounded to the whole pound. Fractions of 1/2 foot or more shall be rounded to the next whole foot. Fractions of 1/2 pound or more shall be rounded to the next whole pound.
- H. Where measurement or weight determined rates with the sum being whichever is greater, the calculation shall be made on the total weight of the shipment and the total measurement of the shipment. Shipments will not be partially rated by weight or measurement. In the absence of a total measurement, the rate shall be calculated on the total weight.
- I. Rates are shown in dollars and cents per one hundred (100) pounds unless otherwise stated.
- J. When rates are expressed as a flat charge per container or platform, with or without excess weight provisions, and multiple commodities are loaded to a single piece of equipment, the applied rate will be the highest applicable commodity rate.

EFFECTIVE: February 1, 2023

APPLICATION OF RATES - ESTIMATED FREIGHT CHARGES:

RULE 190

When requested, Carrier will furnish, either orally, in writing, or by electronic means, an estimate of the tariff charges, applicable on any given shipment, moving under the provisions of this tariff. The estimate will be given on the basis of the effectively published tariff provisions according to the facts, concerning the shipment which are made known to the carrier. Estimates of freight charges are furnished as a convenience to the shipping public and represent nothing more than an approximation of freight charges, which is not binding either on the carrier or the shipper. All transportation charges on a shipment will be assessed on the basis of the published tariff provisions lawfully in effect at the time of shipment.

EFFECTIVE: February 1, 2023

For explanation of abbreviations and reference marks, see the last page of this tariff.

RULES

APPLICATION OF RATES - PER CONTAINER MINIMUM WEIGHTS:

RULE 210

Unless otherwise stated, Class and Commodity rates are based on 20', 24', 40' and 53' container/platforms, or 20', 24', 40' and 53' refrigerated/insulated containers.

Unless otherwise specified in individual Class or Commodity rate items, the containerload minimum weights symbolized by the number in parenthesis next to the total weight minimums indicate minimum weights in thousands of pounds per container/platform. When no equipment size is shown next to the minimum weight the minimum is established for 20' equipment only.

When containers, other than 20', 24', 40' and 53' container/platform or 20', 24', 40' and 53' refrigerated/insulated container (See Item 520 for equipment specifications) are used, the containerload minimum weights or per container rates shall be increased by using the following formulas:

1. Container Load Minimum Weights: Take the minimum weight requirements for a 20' or 40' container/platform or refrigerated/insulated container and increase the minimum weight by the conversion factor shown in (2) below.

If the new containerload minimum weight exceeds the capacity of the container, the charges shall be calculated as a per container rate, by multiplying the per hundred weight rate of the commodity by the containerload minimum weight that had exceeded the capacity of the container. In no case shall a container be loaded to a weight exceeding its capacity or legal road weight limits.

Per Container Rates: Take the per container/platform rate and multiply by the conversion factor shown in (2) below.

2. Increase by conversion factor shown:

20' minimum weight or 20' per container charge	1.0	1.4	1.95	2.5	2.5	2.5
40' minimum weight or 40' per container charge	.7	.85	1.0	1.25	1.25	1.27

EFFECTIVE: February 1, 2023

RULES

APPLICATION OF RATES - NON-RECOURSE CLAUSE:

The party (e.g. consignor, consignee or beneficial owner) that is liable for the freight and other lawful charges shall be liable for, and shall pay to the carrier, all reasonable attorney's fees and costs incurred by the carrier for any legal action taken by the carrier to collect the freight and other charges.

The provisions of the Non-Recourse Clause, if signed by the consignor on the face of the bill of lading, will apply only to a collect shipment or to accessorial services ordered after the shipment has been tendered to AKMR for transportation. Provisions of the Non-Recourse Clause, as set forth on the face of the bill of lading, will not apply to prepaid charges, except as otherwise provided herein.

Where the shipment has been designated as prepaid, the provisions of the Non-Recourse Clause, as set forth on the face of the bill of lading, will apply only to services ordered after the shipment has been tendered to AKMR for transportation. This clause will not release the shipper from responsibility for payment of freight charges or for payment of the accessorial services ordered on the bill of lading that are received prior to, and when, shipment is tendered to AKMR.

EFFECTIVE: February 1, 2023

APPLICATION OF RATES - THROUGH, PROPORTIONAL:

- C. Rates apply only when the shipment has moved directly from origins specified in the rate Item to AKMR's terminal at Seattle, WA.
- D. The provisions of Rules 460, 645 and 882 are not applicable.

EFFECTIVE: February 1, 2023

ADVANCING CHARGES:

(Exception to NMFC Item No. 300)

RULE 300

No charges will be advanced to shippers, owners, consignee, their warehouseman or agents, except those incidental to the transportation of freight (including drayage, wharfage, handling and other terminal charges) and then only on such freight, which in the estimate of the carrier's agent, is valued in excess of freight charges, including the incidental charges described herein. RULES

AUTOMOBILE AND VEHICLE LOADING SPECIFICATION:

RULE 355

Unless excepted by specific tariff commodity provisions or for specific destination ports, personally owned vehicles may have personal effects or other property shipped with them under the following specific conditions.

A. Applicable To All Personally Owned Vehicles

Autos/vehicles may not be loaded with other items of personal or commercial property that would cause them to exceed the gross vehicle weight rating (GVWR) as specified by the manufacturer or that would make them unsafe or unstable to operation on public roadways. Prior to acceptance by Carrier, vehicles will be inspected to verify the GVWR and weighed to determine the total gross weight.

If the vehicle exceeds the GVWR, owners may opt to either remove cargo from the auto/vehicle to lower its weight or to proceed to warehouse receiving for transfer of excess cargo weight to pallets. Cargo transferred from the vehicle to pallets will be billed as less than container load (LCL) cargo the appropriate commodity rates as listed in this tariff. Owners who are not present at the time of delivery of the vehicle may designate their delivery agent to make this choice, but if no owner or agent is present at the time of vehicle is weighed, then the Carrier will remove items indiscriminately to achieve the most suitable weight and will ship the items so removed as LCL cargo at the prevailing rate. The GVWR can often be found embossed on an identification plate inside the driver's side door pillar.

For automobiles or extended cab pickup trucks, no personal property will be accepted if loaded, 1) in the front seat, 2) on the floor of the rear seat, or 3) anywhere within the passenger spaces to a height that interferes with 360 degree visibility by the vehicle operator through the passenger seat or rear compartment windows. No items may be loaded or secured to luggage racks or similar arrangements on the roof of automobiles, with the exception of car-top carriers that are specifically designed to be securely attached to such racks and that may be positively closed as part of a design to be reasonably impervious to weather conditions as normal highway speeds.

B. Pickup Trucks

Pickup truck beds may have personal property loaded in the truck bed, but not to a level any higher than the sides of the bed itself. Proper securing and protection of such property will be the responsibility of the Shipper and subject to inspection and approval by Carrier representatives at the time of receipt of the vehicle. This height limit will not be applied in the case of camper tops or other, similar devices that allow for a cargo space to be created behind the cab of the vehicle and which permits a positive closure and securement of the space and protection of the contents inside.

C. Flatbed Trucks

No personal property or other type of cargo will be accepted if loaded on an open, exposed flatbed truck deck unless advance arrangements have been made and written approval has been granted for the load by a Carrier representative.

Cont'd

For explanation of abbreviations and reference marks, see the last page of this tariff.

RULES

AUTOMOBILE AND VEHICLE LOADING SPECIFICATION:

(Continued)

RULE 355

D. Liability for Non-Factory Installed Cargo Loaded in Automobiles and Pickup Trucks

All such personal property loaded in or on vehicles will be accepted at the Shipper's sole risk of loss or damage from any cause, and no liability for anything other than the vehicle itself will be accepted by the Carrier. Claims will not be accepted for any damages to the vehicle that may be attributed to the loading or securing of such personal property within the vehicle. In addition, Carrier reserves the right to reject any such property if, in its sole judgement, the loading or securing of the property or the nature of the items represents a potential danger to the vehicle, other cargo, or personnel. In that event, Shipper will be given the opportunity to remove the items, or may authorize Carrier to repackage the items and ship them under applicable tariff provisions.

E. Liability for Household Goods and Personal Effects

Household goods or personal effects, as described in AKMR 100, series Item 560 may be placed in enclosed areas of the vehicle, provided they are secured by the Shipper, and after weight of goods has been provided to Carrier. Shipper must declare weight of goods on the Bill of Lading. Items are subject to a released value of \$.10 per pound, per article, subject to provisions listed in AKMR 100, series, Item 560. Items will be considered as Shipper load and count, and accepted to all items.

RULES

LIABILITY:

RULE 574

I. SUMMARY OF LIABILITY PROGRAM:

Carrier maintains a multi-level liability program to address loss or damage to Goods. The liability program includes basic liability, with an opportunity for declaration of a higher value for the Goods, as well as extended liability. In general terms, basic liability provides Shippers with those benefits available pursuant to COGSA, while extended liability provides Shippers with substantially higher limits for liability. The initial determination as to whether the basic or the extended liability program is applicable to particular Goods is made by reference to the rate section of the tariff dealing with those Goods; extended liability will be applicable unless the rate section of the tariff for those Goods explicitly states it is not applicable. In instances in which the goods are being transported pursuant to a written agreement other than a tariff, extended liability will be applicable unless that written agreement explicitly states it is not applicable. The precise terms and conditions of Carrier's liability program applicable to basic liability and extended liability are set forth below, but in summary, basic liability is intended to be a default liability program which will be applicable: when the rate section of the tariff explicitly states those particular Goods are not subject to extended liability; when the written agreement for transportation between Shipper and Carrier explicitly states those particular Goods are not subject to extended liability; when the limits of liability for the extended liability program have been exceeded (with Carrier to be able to credit all payments made under the extended liability program); when an exclusion for the extended liability program is pertinent; and in all other instances in which extended liability is not applicable.

II. BASIC LIABILITY:

Basic liability is that liability for loss or damage to Goods which is set forth in the bill of lading and which is applicable pursuant to Carrier having elected the Carriage of Goods by Sea ACT (referred to herein as COGSA; 46 United States Code §§1301 et seq.), which is deemed fully incorporated herein. Neither Carrier nor the Vessel shall in any event be or become liable for loss or damage to nor in connection with the transportation of the Goods in an amount exceeding \$500 per Package (as defined in Section 1, paragraph h, of Carrier's bill of lading provisions) lawful money of the United States, unless the nature and value of such Goods have been declared by the Shipper before shipment and inserted in the bill of lading or other written agreement executed between Carrier and Shipper, and Shipper has paid the additional charge for such excess valuation declaration. This declaration, if embodied in the bill of lading or other written agreement executed between Carrier and Shipper, shall be prima facie evidence, but shall not be conclusive on the Carrier; in no event shall the Carrier be liable for more than the amount of damage actually sustained or the excess valuation declaration, whichever is less. The charge for any excess valuation declaration shall be two percent (2%) of the value so declared and inserted in the bill of lading.

III. EXTENDED LIABILITY:

Carrier agrees to accept extended liability, which includes basic liability as well as the additional liability as described below, for all Goods other than such Goods for which there is an explicit notation in the rate section of the applicable tariff or in the written agreement for transportation between Shipper and Carrier that extended liability is not applicable with such extended liability to be at all times subject to the terms and conditions, including valuation, limitations and exceptions, set forth herein.

A. PERIOD OF EXTENDED LIABILITY:

The Extended Liability commences at the time the Goods are received by the Carrier and continues during the ordinary course of transit until the Goods are delivered by the Carrier at the destination port or until expiration of 15 days after discharge of the Goods from Carrier's barge(s), whichever occurs first.

RULES

LIABILITY:

(Continued) RULE 574

B. RISKS COVERED:

Extended liability is applicable to all Goods i) unless the rate section of the tariff for those Goods explicitly states Extended Liability is not applicable; or ii) unless otherwise explicitly stated in writing provided to Shipper with such Extended Liability to include all risk of physical loss and/or damage to the applicable Goods from any external cause, as well as costs of landing, warehousing and forwarding, such sue & labor, general average contributions and special charges applicable to , such Goods subject to the terms, conditions, limitations, exclusions and warranties contained in this tariff and other tariffs referencing or incorporating this tariff and/or this Rule.

C. SUFFICIENCY OF PACKING:

Shipper warrants that the goods at the commencement of the period of Extended Liability identified above shall be in good condition, properly marked, packed, packaged, shored and stowed on or within the trailer, tank, platform, rack, pallet or other item used to contain, hold or isolate such Goods, sufficient to withstand the usual hazards of an ocean voyage on the open deck of the barge. In the event Shipper breaches the foregoing warranty, the Extended Liability shall not apply to the loss of or damage to the goods, howsoever caused, even where caused by or contributed to Carrier.

Carrier is not required to accept and will not knowingly accept goods for transportation which are insufficiently packaged to withstand the normal rigors of waterborne transportation. In the event that such insufficiency is not readily detectable and the Carrier unknowingly accepts the goods which are insufficiently packaged, the Carrier shall not be liable for loss or damage to goods due to insufficiency of packaging, whether such insufficiency is apparent to the Carrier at the time of receipt or not. Provided, that in the event Carrier knowingly accepts goods for transportation which are insufficiently packaged to withstand the normal rigors of waterborne transportation and brings such fact to the attention of the Shipper who then requests Carrier to transport the goods in the condition determined by Carrier to be insufficiently packages; Carrier shall not be liable for loss or damage to such goods due to insufficiency of packaging.

In some cases, Carrier may be required by Shipper to stow and secure Shipper's goods to, or within, trailers, containers, platforms or railcars. Said stowing and securing by Carrier shall not relieve Shipper of its obligation to properly package the goods to withstand the normal rigors of waterborne transportation which shall specifically include the ability of the goods to; (i) be stacked in multi tiers (in cases where the freight rate quote contemplates such stacking; (ii) to be secured without crushing via metal banding; (iii) to be self supporting such that the placement of dunnage beneath and on top of the load (in cases where the freight rate quote contemplates stacking of the goods) will not cause damage; and (iv) withstand the elements of the weather including the spray of sea water, rain, snow, ice and sun.

D. NO INDIRECT DAMAGES:

Carrier shall not in any event be responsible for indirect or special damages, including without limitation extra expense, loss of profits, loss of use of property, delay, loss of market or damages consequential upon loss of use, whether resulting from negligence or breach of this contract by Carrier or otherwise and even if the possibility of such damages were foreseeable.

RULES

LIABILITY:

(Continued) **RULE 574**

- 14.) On used vehicles of any description, trailers, machinery, or boats: normal wear and deterioration, including, but not limited to, paint finish or window glass imperfections, minor dents, scratches, rust, tears, and abrasions, or missing articles of equipment, accessories, fixtures or fittings which would not be discerned as obvious damage upon a cursory inspection performed by non-expert, non-technically trained cargo receiving personnel, and which minor damage or missing components cannot be reasonably and unambiguously attributed to cargo mishandling or other act or omission of the Carrier. In the event of any condition of the cargo which impairs the ability of the Carrier to detect such minor damages (i.e. soil, mud, road grime, ice snow, etc.), the Carrier or its agents will cause such condition to be noted on receiving documents, and this will be sufficient to exclude all non-apparent damages. If the general condition of the cargo is such that minor damages or deterioration is widespread, generalized, and of multiple and various types indicative of normal wear and use for the type of cargo, then Carrier's agents will note such general condition, and all but new and specific damages attributable to handling in transit will be excluded. In addition, failure of Carrier to note each and every such item of wear or minor damage during an inspection on receipt of the cargo will not result in Carrier's acceptance of responsibility for damage claims liability for any such items of damage.
- 15.) For units of modular homes, offices, and other buildings (whether on wheeled undercarriages or without wheels): damages sustained to units as a result of any failure of the steel structural framing incorporated into the base of the unit, or any framing or other structural components forming walls, floors, ceiling, or roofs of units. Shipper warrants that steel or equivalently engineered framing will form the base of each modular unit or segments, and that these base structures will be designed and constructed with the knowledge that units will be handled by lifting from underneath at not more than two lifting points across the base and up the sides of the unit by a standard basket sling, forklift blade, or equivalent configuration, and that units will be landed on these same points with weight distributed transversely across the base structure of the unit at appropriate, or designated load distribution positions underneath the unit along its longitudinal axis. Shipper warrants that the base structure and all attached structures of the unit are engineered and fabricated to withstand weight or normal stress of: a.) lifting, b.) lashing and securing to the base structure of the unit only, without any requirement for securing by attachments to walls or lashing over roofs of units, c.) normal motion while resting on transverse load support points and traveling on a vessel in a seaway, and d.) the torsion, flexing, or bending moments induced by such lifting, lashing and motion. Shipper must designate structural lifting points by markings on units or providing diagrams and instructions prior to delivery of the units at the origin terminal. In the absence of such lifting specifications, Carrier will use best judgment and efforts to lift from what appears to be the most appropriate points to achieve balanced weight distribution. Structural failure or damage incurred as a result of lifting under those circumstances is excluded. Also excluded will be any damage resulting from stresses placed on units as described above, as well as damage to any fixtures, appliances, furnishings, or any items placed by Shipper inside the units. Shipper warrants that all openings in permanent or temporary exterior walls are adequately sealed to withstand wind and water damage, and any damage so caused to any part of the unit, whether internal or external, will be excluded from Carrier liability. For used units, all of the exclusions and conditions identified in subparagraph 14.) above will apply.

In the event the valuation for loss or damage to individual parts exceeds the actual cash value including depreciation* of the actual cost to [repair and/or] replace* the entire piece of machinery or equipment, the lesser of such valuations shall be applicable, with liberty to replace the entire piece of machinery or equipment with used machinery or equipment in equivalent condition.
- 3.) Structural Metal, including architectural design elements of buildings or other structures: actual cash value including depreciation*, actual cost to repair and/or replace* or \$2.00 per pound, whichever is less, of such Goods which are actually lost or damaged.

Subject to the limitations noted below as well as any additional limitation noted in the rate section of tariff dealing with the applicable Goods, the foregoing valuations shall be extended to include freight.

* calculated at the port of loading of the applicable Goods.

G. LIMITS OF EXTENDED LIABILITY:

Subject to any other, whether lesser or greater, maximum limitation upon Carrier's liability which may be noted in the rate section of the tariff dealing with applicable Goods or which may be agreed in writing executed by Carrier and Shipper prior to Carrier's receipt of the Goods:

Carrier's liability under the Extended Liability program shall be subject to a maximum limitation of \$75,000.00 per Package (as that term is defined in section 2 of Carrier's bill of lading) or, for Goods not deemed a Package, \$75,000 for all Goods identified on any single bill of lading issued by Carrier.

- A. When Container-load CL freight is tendered for shipment using one or more of the items listed in Note 1 the following allowance shall be made on the weight of the shipment, provided all minimum weight requirements have been met. The shipments scaled gross weight, or shippers weight in the absence of a scaled weight, shall be reduced by the weight of the items listed in Note 1, as declared by the shipper. Allowance shall not exceed five percent (5%) of the total gross weight of the shipment.

Container-load freight prepared for shipment using one or more of the items listed in Note 1 must have such items, and the weight of these items declared on the shipper's bill of lading in order for Carrier to apply any allowance to the shipment.
