

Solutions for Mining Projects

Hercules Aircraft Load Planner

Making the most of your cargo space is essential to keep your project costs down and your cargo safe in transit. Our helpful Load Planner allows you to plan and picture your freight as it will be loaded into the Hercules aircraft. Here are a few more facts about our Hercs to help you plan your load. When you're ready, give us a call. We'll take care of the rest!

L-382 Hercules

***IMPORTANT:** The drawing is only a representation of cargo space available in the L-382 Hercules. Always contact Lynden Air Cargo before producing items that you plan to fly on the aircraft.

Hercules Capabilities Include:

- Accommodates 8 non-contoured pallets or containers with dimensions of 108 inches in length, 88 inches wide, and 96 inches high for pallet positions 1 through 7; the 8th position is 108 inches in length, 88 inches wide, and 76 inches high
- Maximum payload is 48,000 lbs
- Straight-in loading through rear cargo ramp door
- Truck-bed height loading; ramp is adjustable to any position
- Drive-on, drive-off loading for vehicles and heavy equipment (rolling stock)
- Capable of transporting Connex boxes
- Self-contained auxiliary power; minimum ground support required for aircraft systems, offloading, and onloading
- Self-contained winch for loading/unloading cargo
- Aircraft can back up under its own power
- Short and unpaved runway takeoff and landing

Solutions for your Mining Projects

The transportation of mining equipment is a highly specialized job. Whether you need camp modules delivered to a remote site or a charter to transport a blasting machine to the top of a mountain for exploration, Lynden Air Cargo can provide the services you need to make your mining operation a success.

For more than a decade, our fleet of Hercules aircraft and knowledgeable staff have been providing support to help mining customers explore, develop and operate mines all over the world. From copper and zinc to silver and gold, we are committed to helping you safely and cost-effectively bring your product to market.

Ongoing mine operation or startup, we use our expertise, experience, infrastructure and personnel to handle anything you need flown. Our Hercs can carry the heaviest, outsized loads into areas with no road system – we can even land on frozen lake runways if that's what it takes to deliver

replacement parts for an idle piece of equipment or any other essential freight to keep your mine operation on track. With a payload of 48,000 pounds, our Hercs routinely carry drills, blasting machines, pipe, bulldozers, graders, trucks and any other equipment needed to support mine operations.

One of our calling cards is the ability to resupply up to 6,400 gallons of fuel at remote mine sites. The aircraft is reconfigured with our specialized bulk tank system and ready to haul fuel based on your requirements. We can refuel your tanks right on the tarmac then be on our way.

We have built a reputation among mining customers with dependable service, innovation and quick response. Count on us to fly your underground or surface freight exactly where it needs to go. Lynden Air Cargo crews are available around the clock to accommodate your needs.
