Hercules Aircraft Load Planner

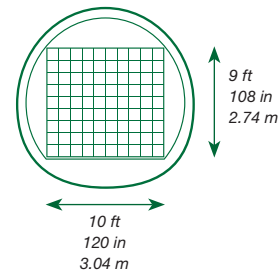

Making the most of your cargo space is essential to keep your project costs down and your cargo safe in transit. Our helpful Load Planner allows you to plan and picture your freight as it will be loaded into the Hercules aircraft. Here are a few more facts about our Hercs to help you plan your load. When you're ready, give us a call. We'll take care of the rest!

Hercules Capabilities Include:

- Accommodates 8 non-contoured pallets or containers with dimensions of 108 inches in length, 88 inches wide, and 96 inches high for pallet positions 1 through 7; the 8th position is 108 inches in length, 88 inches wide, and 76 inches high
- Maximum payload is 48,000 lbs
- Straight-in loading through rear cargo ramp door
- Truck-bed height loading; ramp is adjustable to any position
- Drive-on, drive-off loading for vehicles and heavy equipment (rolling stock)
- Capable of transporting Connex boxes
- Self-contained auxiliary power; minimum ground support required for aircraft systems, offloading, and onloading
- Self-contained winch for loading/unloading cargo
- Aircraft can back up under its own power
- Short and unpaved runway takeoff and landing

Solutions for your Oil and Gas Projects

Lynden Air Cargo has a long history of supporting the oil and gas industry in Alaska, Canada, Russia and all over the world. Our fleet of Hercules aircraft and our knowledgeable staff can arrange pickup and delivery of anything you might need in your daily operations at the most remote oil field and exploration areas.

We transport equipment and supplies and handle complex logistics for the top companies in the oil business — all played out in some of the toughest environments you can imagine. We use our expertise, experience, infrastructure and personnel to handle anything you need flown onshore or offshore. Our Hercs can carry the heaviest, outsized loads into areas without runways or roads — we can even land on ice if that's what it takes to deliver needed parts for an idle rig or other essential freight to keep your operation on track. With a payload of 48,000 pounds, our Hercs routinely carry camp modules, drill rigs, vehicles and other equipment to support our oil field customers.

Oil and gas projects can be challenging, and Lynden understands the serious nature of handling oil and

hazardous substances safely and in an environmentally responsible manner. Our experience includes charter flights of haz-mat material from Houston to Aruba to orchestrating an international oil field move involving three modes of transportation in three countries.

Lynden Air Cargo Hercs have provided long-term air lift and logistics support for a gas development project in Papua New Guinea and we've flown more than one million pounds of cargo into the Amazon jungle to supply an oil company's remote work camps.

We have built a reputation on serving oil and gas customers with dependable service, innovation and quick response. Scheduled or charter, onshore or offshore, count on us to fly your oil field freight exactly where it needs to go. Lynden Air Cargo crews are available around the clock to accommodate your needs.
