

*Global Air & Ocean Forwarding and Logistics*

---

# Our experience makes us different

## Who is Lynden International?

Lynden has provided transportation and logistics solutions to our customers since 1906. Over that time, we've gained proven expertise offering services to customers in such areas as Alaska, Hawaii, Puerto Rico, Guam, Canada, Mexico, Russia and Western Europe.

Operating in the global marketplace as Lynden International, we offer a full scale of transportation and logistics solutions including air and sea, Customs brokerage, value added services, local pick-up and delivery, warehousing and distribution, and state-of-the-art technology.

We're not too big, allowing flexibility in services, or too small, which enables us to offer competitive pricing. We've developed close working relationships with air and steamship carriers as well as government agencies. This benefits our customers with priority bookings, loadings and clearance needs.

# What Lynden International Offers

Lynden International services North America like no one else. We have the experience, coverage and people to handle your freight movement, destination services and logistical challenges anywhere within Alaska, Hawaii, Puerto Rico, U.S. Lower 48, Canada and Mexico.

Our worldwide coverage provides complete services to major world markets, utilizing a network of service centers and strategic partners including Russia, Western Europe, Asia, India, and Latin America.

# Industry Solutions

You may not understand the term “forced freight” if you’re in aerospace, and those in the tradeshow and exhibit industries might not know the meaning of aircraft on ground (AOG). That’s okay, because Lynden International does. We know the jargon and market requirements to provide service and solutions in most major industries.

We enjoy a logistical challenge too, so bring us your complex oil and gas projects and we’ll come up with a winning strategy together.

From pharmaceuticals and plasma, to T-shirts and timing belts, it’s our business to know your business.

- Aerospace
- Automotive
- Commercial and Government Projects
- Electronics
- Global Health and Humanitarian
- Home Delivery
- Industrial Machine and Manufacturing
- Oil and Gas
- Pharmaceutical
- Retail
- Seafood
- Tradeshow and Exhibits

## Why Lynden?

Lynden has a wealth of knowledge, experience and resources relating to all aspects of transportation and logistics. We have the experience and infrastructure to provide a comprehensive program at a competitive price.

Language, culture, time barriers, variable Customs requirements and trade laws can be perilous if you don’t know what you’re doing. Lynden’s approach is to minimize risks and maximize opportunities for our customers, by providing:

- Reliable and flexible service
- Experience
- Consistent communication
- Pay for the speed you need
- Advanced communications capabilities
- EZ Commerce – shipping, tracing reporting and invoicing
- Competitive pricing via advantageous multi-national contract rates and boarding for both air and ocean
- Efficient Customs clearance
- Standardized operating and security procedures

## In-Transit Visibility and Communication

Web based services such as Proof of Delivery and customized and scheduled reports on shipment activities can be viewed, downloaded or emailed based on your needs and requirements.

Our technology is built with you in mind to save you time, make your job easier and save you money.

Lynden International's flexibility allows us to give you on-time service at competitive rates to meet and exceed your requirements. With such flexibility and personal care, you'll immediately see why we say "Our people deliver the world."

Additional technological solutions include:

- EZ Commerce
- EDI and XML Interface
- Purchase Order and Warehouse Management Systems
- Returns and Replenishment Programs

## The Lynden Difference

Making sure your shipment reaches its destination properly could determine the success or failure of your business. No matter what industry or commodity, trust and rely on Lynden International to deliver cost effective solutions throughout your supply chain.

- Financial Strength
- Reliability and Experience
- Enhanced Customer Service
- Information Technology
- Facility Management
- Total Quality Management
  - Plus One Program
  - Quality Business Review Process
