

Lynden Client Access System (LCAS):

When information matters most,
your logistics business at your fingertips.

Your decision to outsource your logistics business does not mean losing control over access to your company's information.

Lynden listened to our clients. We are leveraging the power of the internet and the benefits of portability. Our LCAS web-based system is just one example of how Lynden continues to invest to make it easier for clients to do business with us.

Gain visibility to your logistics activity online and in real time. You have access to view customers orders, previous day's sales, week-to-date, month-to-date, and year-to-date sales. Access proof of delivery by shipment, obtain carrier and delivery information, and view receipt status and inventory status. Run reports in PDF or Excel formats including sales recap, shipped orders, open orders, receipts, returns and inventory.

Included in the Lynden Client Access System:

- **Dashboard View** — Sales Recap - Previous day, WTD, MTD, and YTD
- **Customer Order & Sales** — Drill down inquiry to the lot level details
- **Receipts** — By ASN, PO or item - drill down to the line level
- **Inventory** — By warehouse, by item number, by lot number
- **Customer Returns** — Search by RMA, ASN, or item number
