**EQUIPMENT SELECTION SAMPLER**

- **DRY STANDARD**
  Suitable for normal container cargo.

- **DRY 102" WIDE**
  The added width allows 48" pallets to be loaded side by side producing 7 - 12% more cubic capacity and 11% more pallet capacity than normal high cube containers. Also allows for 8" wide goods to move easily.

- **REFRIGERATED**
  Designed to transport cargo requiring temperature control. The selection of sizes we offer gives the shipper the flexibility of matching container sizes with the many different cargo temperature requirements to achieve the best product outturn.

- **PLATFORM**
  Specifically designed for heavy lift, odd/oversize or flatbed type cargoes. Offered both in posted and unposted configurations.

- **BULK LIQUID**
  Designed specifically to move a wide variety of bulk liquid chemicals and petroleum.

- **DRY PNEUMATIC**
  Special low pressure dry bulk pneumatic container allows the efficient movement of dry bulk items such as cement, lime or soda ash. The pneumatic container allows the special low pressure dry bulk configuration.

- **CHASSIS**
  Designed to transport cargo requiring temperature control. The selection of sizes we offer gives the shipper the best product outturn.

**SPECIAL NOTES**
- Maximum Gross Capacity of the equipment may exceed lifting capacity of $2,000/#. In those cases, Payload plus Tare must be below $2,000/#.
- All loads, especially containers 40' or over must have the weight evenly distributed over the entire length of the container.
- All loads must not exceed legal road limits when moved over public roads. Costs incurred due to overloading is to the account of the cargo.
- *All weights provided above defined as:
  - Gross-Maximum cargo or payload weight plus the tare weight of the container.
  - Eliminated maximums may vary by state.
- *The list above illustrates the most common equipment types in our fleet, some variations may exist.
