LYNDEN INTERNATIONAL LOGISTICS CO.

*Optimizing strength to create value for
our clients.*

Logistics Solutions that Mean Business

"A chain is as strong as its weakest link." Every facet of your operation has to fit together seamlessly and every part of the chain must be strong, yet flexible enough to react quickly to shifts in market conditions and corporate goals.

At Lynden International Logistics, we partner with you to build completely integrated logistics solutions that link and strengthen your business processes and help the flow of information propel your business forward. We are your link to increased customer satisfaction. To reduce costs and improved efficiencies. To peace-of-mind outsourcing of all your logistics needs. To a return to your core competencies. To a stronger competitive edge.

You Need a Logistics Partner Who Understands Your Strategic Goals

Finding a compatible outsource partner is the first step in getting the right logistics solutions. Lynden International Logistics works to understand your business before designing the strategy that meets your objectives. We blend smoothly with your operational processes to improve cost-efficiencies and add new value. And we share your dedication to outstanding customer service, a quality we build into every solution we provide.

Whether you want to outsource your entire logistics operation, a specific segment, or simply enhance your own logistics efficiencies, Lynden International Logistics's customized solutions will meet or exceed your requirements. From Order Collection

and Processing, Warehousing and Inventory Management, Transportation Management, Invoicing and Accounts Receivable Management, Advanced Logistics Systems and Technology, Value-added Services and Customized Solutions, we are your single-source provider for logistics management.

Lynden International Logistics: The Right Fit

Lynden International Logistics is committed to being the leading logistics provider. As a complete solutions provider, we not only supply your logistics services, we also manage all of the information associated with ordering, inventory management, movement and replenishment of goods throughout your operations. Then, we ensure Lynden International Logistics continues to 'fit' your business by following our partnership principles of accountability, communication and continuous quality improvement. We work with you to keep your business on track and moving in the strategic directions that build your profits.

Outsourcing as a Competitive Edge

*Outsourcing has become more than just a means of cost control for companies. Executives see it as a competitive tool. Within the next three years, 93% of the world's top executives surveyed expect to outsource all or part of at least one business function.**

Manufacturers are moving to logistics outsourcing in record numbers. Outsourcing delivers optimized flexibility by keeping you in the forefront of logistics innovation, meaning you can adapt readily to change without impacting your infrastructure. You can also reduce your commitment to ongoing capital investments while improving procedures that influence product quality and customer satisfaction. In fact, outsourcing can boost your competitive position since you become freed up to focus on core competencies: you avoid the risk of wasting valuable time and money in areas where you may lack expertise.

Partner with Lynden International Logistics and achieve your growth objectives through our logistics expertise and economies of scale. After all, we do what we do best, to help you do what you do best, better.
