JTOMOB	ILE AND VEHICLE LOADING SPECIFICATION:	355
	epted by specific tariff commodity provisions or for specific destination ports, personally owned vehicles may have ffects or other property shipped with them under the following specific conditions.	
A.	Applicable To All Personally Owned Vehicles	
	Autos/vehicles may not be loaded with other items of personal or commercial property that would cause them to exceed the gross vehicle weight rating (GVWR) as specified by the manufacturer or that would make them unsafe or unstable to operation on public roadways. Prior to acceptance by Carrier, vehicles will be inspected to verify the GVWR and weighed to determine the total gross weight.	
	If the vehicle exceeds the GVWR, owners may opt to either remove cargo from the auto/vehicle to lower its weight or to proceed to warehouse receiving for transfer of excess cargo weight to pallets. Cargo transferred from the vehicle to pallets will be billed as less than container load (LCL) cargo the the appropriate commodity rates as listed in this tariff. Owners who are not present at the time of delivery of the vehicle may designate their delivery agent to make this choice, but if no owner or agent is present at the time of vehicle is weighed, then the Carrier will remove items indiscriminately to achieve the most suitable weight and will ship the items so removed as LCL cargo at the prevailing rate. The GVWR can often be found embossed on an identification plate inside the driver's side door pillar.	
	For automobiles or extended cab pickup trucks, no personal property will be accepted if loaded, 1) in the front seat, 2) on the floor of the rear seat, or 3) anywhere within the passenger spaces to a height that interferes with 360 degree visibility by the vehicle operator through the passenger seat or rear compartment windows. No items may be loaded or secured to luggage racks or similar arrangements on the roof of automobiles, with the exception of car-top carriers that are specifically designed to be securely attached to such racks and that may be positively closed as part of a design to be reasonably impervious to weather conditions as normal highway speeds.	
Β.	Pickup Trucks	
	Pickup truck beds may have personal property loaded in the truck bed, but not to a level any higher than the sides of the bed itself. Proper securing and protection of such property will be the responsibility of the Shipper and subject to inspection and approval by Carrier representatives at the time of receipt of the vehicle. This height limit will not be applied in the case of camper tops or other, similar devices that allow for a cargo space to be created behind the cab of the vehicle and which permits a positive closure and securement of the space and protection of the contents inside.	
C.	Flatbed Trucks	
	No personal property or other type of cargo will be accepted if loaded on an open, exposed flatbed truck deck unless advance arrangements have been made and written approval has been granted for the load by a Carrier representative.

D. Liability for Non-Factory Installed Cargo Loaded in Automobiles and Pickup Trucks	
All such personal property loaded in or on vehicles will be accepted at the Shipper's sole risk of loss or damage from any cause, and no liability for anything other than the vehicle itself will be accepted by the Carrier. Claims will not be accepted for any damages to the vehicle that my be attributed to the loading or securing of such personal property within the vehicle. In addition, Carrier reserves the right to reject any such property if, in its sole judgement, the loading or securing of the property or the nature of the items represents a potential danger to the vehicle, other cargo, or personnel. In that event, Shipper will be given the opportunity to remove the items, or may authorize Carrier to repackage the items and ship them under applicable tariff provisions.

RULE

RULES AND REGULATIONS

LIABILITY:

I. SUMMARY OF LIBALITY PROGRAM:

Carrier maintains a multi-level liability program to address loss or damage to Goods. The liability program includes basic liability, with an opportunity for declaration of a higher value for the Goods, as well as extended liability. In general terms, basic liability provides Shippers with those benefits available pursuant to COGSA, while extended liability provides Shippers with substantially higher limits for lability. The initial determination as to whether the basic or the extended liability program is applicable to particular Goods is made by reference to the rate section of the tariff dealing with those Goods; extended liability will be applicable unless the rate section of the tariff for those Goods explicitly states it is not applicable. In instances in which the goods are being transported pursuant to a written agreement other than a tariff, extended liability will be applicable unless that written agreement explicitly states it is not applicable.

The precise terms and conditions of Carrier's liability program applicable to basic liability and extended liability are set forth below, but in summary, basic liability is intended to be a default liability program which will be applicable: when the rate section of the tariff explicitly states those particular Goods are not subject to extended liability; when the written agreement for transportation between Shipper and Carrier explicitly states those particular Goods are not subject to extended liability; when the limits of liability for the extended liability program have been exceeded (with Carrier to be able to credit all payments made under the extended liability program); when an exclusion for the extended liability program is pertinent; and in all other instances in which extended liability is not applicable.

II. BASIC LIABILITY:

Basic liability is that liability for loss or damage to Goods which is set forth in the bill of lading and which is applicable pursuant to Carrier having elected the Carriage of Goods by Sea ACT (referred to herein as COGSA; 46 United States Code §§1301 et seq.), which is deemed fully incorporated herein. Neither Carrier nor the Vessel shall in any event be or become liable for loss or damage to nor in connection with the transportation of the Goods in an amount exceeding \$500 per Packages (as defined in Section 2 of Carrier's bill of lading provisions) lawful money of the United States, unless the nature and value of such Goods have been declared by the Shipper before shipment and inserted in the bill of lading or other written agreement executed between Carrier and Shipper, and Shipper has paid the additional charge for such excess valuation declaration. This declaration, if embodied in the bill of lading or other written agreement executed between Carrier and Shipper, shall be prima facie evidence, but shall not be conclusive on the Carrier; in no event shall the Carrier be liable for more than the amount of damage actually sustained or the excess valuation declaration, whichever is less. The charge for any excess valuation declaration shall be two percent (2%) of the value so declared and inserted in the bill of lading.

III. EXTENDED LIABILTY:

Carrier agrees to accept extended liability, which includes basic liability as well as the additional liability as described below, for all Goods other than such Goods for which there is an explicit notation in the rate section of the applicable tariff or in the written agreement for transportation between Shipper and Carrier that extended liability is not applicable with such extended liability to be at all times subject to the terms and conditions, including valuation, limitations and exceptions, set forth herein.

RULES AND REGULATIONS

LIABILITY: (Continued)

III. EXTENDED LIABILTY: (Continued)

A) <u>PERIOD OF EXTENDED LIABILITY</u>:

The Extended Liability commences at the time the Goods re received by the Carrier and continues during the ordinary course of transit until the Goods are delivered by the Carrier at the destination port or until expiration of 15 days after discharge of the Goods from Carrier's barge(s), whichever occurs first.

B) <u>RISKS COVERED</u>:

Extended liability is applicable to all Goods i) unless the rate section of the tariff for those Goods explicitly states Extended Liability is not applicable; or ii) unless otherwise explicitly stated in writing provided to Shipper with such Extended Liability to include all risk of physical loss and/or damage to the applicable Goods from any external cause, as well as costs of landing, warehousing and forwarding, such sue & labor, general average contributions and special charges applicable to , such Goods subject to the terms, conditions, limitations, exclusions and warranties contained in this tariff and other tariffs referencing or incorporating this tariff and/or this Rule.

C) <u>SUFFICIENCY OF PACKING</u>:

Shipper warrants that the goods at the commencement of the period of Extended Liability identified above shall be in good condition, properly marked, packed, packaged, shored and stowed on or within the trailer, tank, platform, rack, pallet or other item used to contain, hold or isolate such Goods, sufficient to withstand the usual hazards of an ocean voyage on the open deck of the barge. In the event Shipper breaches the foregoing warranty, the Extended Liability shall not apply to the loss of or damage to the goods, howsoever caused, even where caused by or contributed to Carrier.

Carrier is not required to accept and will not knowingly accept goods for transportation which are insufficiently packaged to withstand the normal rigors of waterborne transportation. In the event that such insufficiency is not readily detectable and the Carrier unknowingly accepts the goods which are insufficiently packaged, the Carrier shall not be liable for loss or damage to goods due to insufficiency of packaging, whether such insufficiency is apparent to the Carrier at the time of receipt or not. Provided, that in the event Carrier knowingly accepts goods for transportation which are insufficiently packaged to withstand the normal rigors of waterborne transportation and brings such fact to the attention of the Shipper who then requests Carrier to transport the goods in the condition determined by Carrier to be insufficiently packages; Carrier shall not be liable for loss or damage to such goods due to insufficiency of packaging.

In some cases, Carrier may be required by Shipper to stow and secure Shipper's goods to, or within, trailers, containers, platforms or railcars. Said stowing and securing by Carrier shall not relieve Shipper of its obligation to properly package the goods to withstand the normal rigors of waterborne transportation which shall specifically include the ability of the goods to; (i) be stacked in multi tiers (in cases where the freight rate quote contemplates such stacking; (ii) to be secured without crushing via metal banding; (iii) to be self supporting such that the placement of dunnage beneath and on top of the load (in cases where the freight rate quote contemplates stacking of the goods) will not cause damage; and (iv) withstand the elements of the weather including the spray of sea water, rain, snow, ice and sun.

E) <u>EXCLUSIONS</u>: (Continued)

- 14.) on used vehicles of any description, trailers, machinery, or boats: normal wear and deterioration, including, but not limited to, paint finish or window glass imperfections, minor dents, scratches, rust, tears, and abrasions, or missing articles of equipment, accessories, fixtures or fittings which would not be discerned as obvious damage upon a cursory inspection performed by non-expert, non-technically trained cargo receiving personnel, and which minor damage or missing components cannot be reasonably and unambiguously attributed to cargo mishandling or other act or omission of the Carrier. In the event of any condition of the cargo which impairs the ability of the Carrier to detect such minor damages (i.e. soil, mud, road grime, ice snow, etc.), the Carrier or tis agents will cause such condition to be noted on receiving documents, and this will be sufficient to exclude all non-apparent damages. If the general condition of the cargo is such that minor damages or deterioration is widespread, generalized, and of multiple and various types indicative of normal wear and use for the type of cargo, then Carrier's agents will note such general condition, and all but new and specific damages attributable to handling in transit will be excluded. In addition, failure of Carrier to note each and every such item of wear or minor damage during an inspection on receipt of the cargo will not result in Carrier's acceptance of responsibility for damage claims liability for any such items of damage.
- 15.) For units of modular homes, offices, and other buildings (whether on wheeled undercarriages or without wheels): damages sustained to units as a result of any failure of the steel structural framing incorporated into the base of the unit, or any framing or other structural components forming walls, floors, ceiling, or roofs of units. Shipper warrants that steel or equivalently engineered framing will form the base of each modular unit or segments, and that these base structures will be designed and constructed with the knowledge that units will be handled by lifting from underneath at not more than two lifting points across the base and up the sides of the unit by a standard basket sling, forklift blade, or equivalent configuration, and that units will be landed on these same points with weight distributed transversely across the base structure of the unit at appropriate, or designated load distribution positions underneath the unit along its longitudinal axis. Shipper warrants that the base structure and all attached structures of the unit are engineered and fabricated to withstand weight or normal stress of: a.) lifting, b.) lashing and securing to the base structure of the unit only, without any requirement for securing by attachments to walls or lashing over roofs of units, c.) normal motion while resting on transverse load support points and traveling on a vessel in a seaway, and d.) the torsion, flexing, or bending moments induced by such lifting, lashing and motion. Shipper must designate structural lifting points by markings on units or providing diagrams and instructions prior to delivery of he units at the origin terminal. In the absence of such lifting specifications, Carrier will use best judgment and efforts to lift from what appears to be the most appropriate points to achieve balanced weight distribution. Structural failure or damage incurred as a result of lifting under those circumstances is excluded. Also excluded will be any damage resulting from stresses placed on units as described above, as well as damage to any fixtures, appliances, furnishings, or any items placed by Shipper inside the units. Shipper warrants that all openings in permanent or temporary exterior walls are adequately sealed to withstand wind and water damage, and any damage so caused to any part of the unit, whether internal or external, will be excluded from carrier liability. For used units, all of the exclusions and conditions identified in subparagraph 14.) above will apply.

The carrier has the right to refuse cargo requiring a temperature lower that the temperature at which the cargo was received.	
The carrier may, at its discretion, accept cargo originally requesting a temperature lower than the temperature at which the cargo was received and then, only if the shipper amends the bill of lading to show a request for the temperature at which the cargo was actually received.	
I. REFRIGERATION TEMPERATURE CONTROL SERVICES - FROZEN OR COLD PACK SERVICE:	
When a temperature of 0 degrees F to -10 degrees F is requested, the shipment will move under the following provisions of frozen or cold pack service, in addition to the provisions noted above:	
(A) Carrier will provide refrigeration equipment designed to maintain the requested temperature; however, the service being provided is only to keep the internal air at temperatures of 0 degrees F to -10 degrees F. Carrier will not be liable for temperature fluctuations below 0 degrees F indicative to carrier's liability. The burden of proof of loss or damage to the cargo lies with the shipper or consignee.	
II. REFRIGERATION TEMPERATURE CONTROL SERVICES - OTHER THAN FROZEN OR COLD PACK SERVICE:	
When a temperature above 0 degrees F to 70 degrees F is requested, the shipment will move under the following provisions of refrigerated temperature control service in addition to the provisions noted above:	
(A) Carrier will provide refrigeration equipment designed to maintain the requested temperature; however, the service being provided is only to keep the internal air at temperatures 5 degrees F of either side of the requested temperature. Carrier will not be liable for temperature fluctuations of 5 degrees F or less, nor are temperature fluctuations beyond 5 degrees F indicative of carrier's liability. The burden of proof of loss or damage to the cargo lies with the shipper or consignee (See Notes 1 through 2).	
NOTE 1: It is the shipper's responsibility to load freight in such a manner that proper air flow is maintained during shipment. Carrier will not be liable for any loss or damage to cargo due to restricted air flow caused by improper loading. Carrier is not liable for quality of product at destination if temperatures described in this rule are maintained.	
NOTE 2: Carrier has not control over the product pulp temperature at time of pickup from the shipper. Therefore, carrier assumes no lability if, at destination, the product pulp temperature varies from the internal air temperature of the refrigeration equipment as established by the carrier's reefer charge and/or reefer logs only.
