(Applies only when specifically referenced)

Overwidth and overheight conditions are assessed separately and will be cumulative in cases where units meet both criteria.

Overweight loads will require permits and specialized trailer equipment to move between terminals. Charges will be ▲ provided on a special quote basis.

If a load is both overweight and over-dimension, then only the higher of 1) the combination of dimensional charges or 2) the overweight charge will apply. The overweight charge will not be cumulative in that case.

Single pieces or loads of cargo that are higher or heavier than certain upper limits, and which are consigned to Neighbor Islands beyond Oahu, may require on-carriage by use of specialized trailers that will be required to convert the loads into Roll-On / Roll-Off shipments for handling by the inter-island barge carrier. This applies only to units that are not wheeled, tracked, or on trailers and not capable of being driven or towed onto a barge. This typically applies to particularly heavy items or those exceeding 11'6" overall width. In those cases, it will be the responsibility of the shipper to make arrangements for, and to pay for the use of the trailers in transit. ***
