BUILDING PANELS, STRUCTURAL (T)					1200-003
LCL	7.77	8.62	10.36	11.81	
Min 1,280 cuft	6.31	5.97	7.51	9.99	

Viz. Wall panels, or sections, insulated, exterior.

NOTE 1. Rates are in dollars and cents per cubic foot.

NOTE 2. Rates apply to Shipper Loaded platforms only. For application of mixed commodity Shipper Loaded platforms, apply the provisions of Item 1200-000.

NOTE 3. Subject to packaging requirements as follows:

Bundles: Items should be bundled into units not exceeding 8'6" in width and 8'6" in height, including accompanying dunnage, bracing, side protection, or other materials. Bundles must be protected with clear, reinforced poly.

Shipper shall make every effort to package panels of like lengths to form a uniform package. In cases where like lengths cannot be packaged together, any panels extending beyond where the side/end protection as described below cannot be affixed in a practical manner, each extending panel must be protected by inserting a wood framing member into the area between the spline edges and securely affixed. In cases where edges cannot be squared up and flush on both ends, every effort should be made to square up the unit flush on one end.

Dunnage: Bundles must be packaged with a minimum of the following dunnage requirements, spaced at sufficient intervals to maintain the rigidity of the panels as per the stacking information below:

Dunnage Size:

- Units not exceeding 4' in width and/or 5,000 lbs: 3½" dunnage
- Units exceeding 4' in width and/or 5,000 lbs: 5½" dunnage

Dunnage Spacing, minimum dunnage height of 5.5":

- Units not exceeding 15' in length: Minimum of 3 pieces of wood dunnage

BUILDING PANELS, STRUCTURAL (T) (continued) 1200-003

Exposed Foam Core Panels: Foam core panels with exposed foam core or with wood skin extending beyond a wood framing member, must have side protection of wood, OSB or plywood, minimum ¼" thickness, which substantially covers all sides of the unit. Panels without exposed foam core, or without the wood skin extending beyond a wood framing member are not required to have side protection, but some form of side protection is recommended.

Stacking: At a minimum, the units shall be packaged and constructed to withstand the forces generated while stowed aboard a barge to a height equivalent to four (4) - 8.5' high panel units stacked upon one another.

Metal Skin Panels: Foam core panels with metal skin must be export crated for platform shipment, or must be shipper loaded, consignee unloaded, to closed containers. Carrier will not receive uncrated panels. Crating must fully enclose panels and be of sufficient strength to allow stacking two like crates.

Liability: Exception to tariff STB AKMR 100, series, Rule 574 (Liability): Notwithstanding the foregoing packaging requirements, Carrier accepts no liability for compression related damage when units are stacked as referenced above. The above packaging requirements are required for Carrier handling purposes only, and do not warrant protection of the product from damage due to insufficient packaging or the inherent nature of the product. Shipper is required to package sufficiently to protect the product from damage of shipment by open deck
