## Solutions for safe, dependable transport of your special commodities

The transportation of bulk products, especially hazardous materials and chemicals, require extra care and attention to the safety of personnel and the environment. Selecting a partner to handle, store and transport these unique products should ever be left to chance. Alaska West Express has decades of experience specializing in moving bulk liquids and bulk dry products including hazardous materials to support the oil, mining, construction and other industry's needs. With our custom-built equipment specifically designed and tailored to the customer, the commodity or the industry, we can provide the safest most efficient solution for your bulk product transportation needs at a competitive price.

### Getting it there

If you are looking for a solution to your bulk transportation needs, Alaska West Express has the people, equipment and partners you can count on. In Alaska, we are the leader in transporting liquid and dry bulk products, hazardous and non-hazardous chemicals and petroleum products. We have earned a reputation for safe, dependable service to the oilfield, mining, construction and manufacturing industries with unrivaled service to locations on the North Slope of Alaska.

### Intermodal Facilities

Whether by railcar, steamship, barge or over-the-road (OTR), we have the connections to deliver your bulk chemicals on time and within budget. Our Fairbanks, AK intermodal transfer facility offers railcar to trailer transfer on a certified scale for maximum payload, while providing full containment. The 32-acre facility includes 6,000 feet of rail track, a complete vapor recovery system, warehousing, a pipe and materials storage laydown yard and certified tank maintenance and cleaning. Oilfield tubulars, bulk and liquid products en route to Alaska's North Slope are transferred here from railcars and trucked north. Additional intermodal yards are located in Tacoma, Seattle and Anchorage supported by Lynden hub locations in Chicago, Houston, and Kansas City.

### Equipment

With our modern fleet of intermodal tanks, specialized chassis, pneumatic bulkers, chemical and petroleum tankers, and flatbeds we have the equipment to handle your chemical or dry bulk transportation needs.

### Experience

Since 1984 customers have relied on Alaska West Express to handle, transport and manage their bulk products to Alaska and within Alaska. We provide extensive training to all of our people to safely and efficiently deal with your products, and to ensure regulatory compliance in regards to all aspects of your shipments.
