Oil and Gas Project Logistics

Solutions for the energy industry

From the Trans-Alaska Pipeline construction in the 1970s to today's global oilfield operations and exploration, Lynden has a long history of supporting the oil and gas industry. We transport equipment and handle complex logistics for the top companies in the business in some of the toughest environments in the world. With a variety of intermodal service options, we have the expertise, experience, infrastructure and personnel to handle anything you need shipped, trucked or flown onshore or offshore.

Getting it there

We've spent decades hauling oversized freight to the oilfields of Alaska, and we understand the oil and gas industry. Whether you have a drill rig, camp modules or pipe, we know how to move it efficiently, safely and on schedule. Using our fleet of L-382 Hercules aircraft, specialized trucks, barges and hovercraft, we transport oil and gas materials throughout Alaska, Canada and worldwide. And we do it all with an emphasis on safety and compliance with industry regulations. Ongoing employee safety training and meticulous equipment maintenance result in safety awards each year for our accident-free service and reliable customer deliveries. Lynden was also the first Alaskan carrier to qualify for the Environmental Protection Agency (EPA) SmartWay Transport Partnership.

Experience

- ▶ We have partnered with customers on some of the biggest, most memorable projects in the industry, including the development of the Prudhoe Bay oil fields in the 1970s and the Bakken oilfields today.
- ▶ Lynden has flown millions of pounds of equipment into the Amazon jungle to support exploration in Peru and into the jungles of Papua New Guinea for construction of an LNG operation. We've moved drill rigs out of our Houston Service Center bound for Russia and other points all over the world, and towed offshore drill rigs from Alaska to Seattle for maintenance. Lynden has also assisted with support for offshore drill sites in Newfoundland and the Chuckchi Sea.
- ▶ Lynden drivers steer trucks over ice roads and our captains float hovercraft above frozen lakes and rivers to deliver crews and equipment to remote locations. Our Hercules pilots land on frozen lakes to make deliveries to support our oil and gas customers during winter drilling. We also support the industry in spill response and other emergencies.

Whether it's a multiple-year project or a one-time delivery, trust Lynden to make it happen. Decades of experience and the ability to call upon the strength of more than 15 asset-based transportation and logistics companies sets us apart from our competitors.

The Lynden Difference

- ▶ Quest for Quality award-winning customer service. The most industry-experienced staff in Prudhoe Bay, Kenai and locations throughout Alaska.
- ▶ Highest quality equipment in the industry and specialty equipment to support infield deliveries, including: curtain-side vans/flats to move your loads and keep them clean; air-ride equipment, step decks, stretch decks, Landoll trailers, standard high deck 53's and more.
- ▶ A 16-acre yard on the North Slope (one of the largest at Prudhoe Bay) to support customer projects.
- ▶ Seven-day-a-week service from Fairbanks to Prudhoe Bay for truckload, six-day-a-week service for Less-Than-Truckload (LTL) and one-day service from Anchorage to Fairbanks or Prudhoe Bay. Seven-day scheduled service from Texas/Oklahoma/Los Angeles to Prudhoe Bay with scheduled LTL three-day service from Edmonton-Calgary, Alberta.
- ▶ Licensed customs brokers and consolidations at all Lynden Service Centers to reduce overall transportation expense.
- ▶ Unique Dynamic Routing service allows customers to "only pay for the speed you need" by using trucks, ships, barge, ferry or aircraft in any combination to balance cost and speed.
- ▶ Hot shot and team driver service from Texas, Canada, and within Alaska to meet critical timing on projects.
- ▶ Purchase order, warehouse and inventory management – C2C (Conception 2 Consumption).
- ▶ Certified hazardous materials transportation and packaging expertise.
- ▶ Fairbanks rail and chemical transfer facility.
- ▶ Multiple Alaska-based Hercules aircraft.
