

## Transportation Compliance

Lynden Training Center (formerly Alaska West Training Center) has been providing training in hazardous materials transportation, emergency response for hazardous materials, specialized rescue, Incident Command System, hazardous waste and work place safety training to Alaska since 1995. Lynden Training Center, a division of Alaska West Express, Inc., is 'the hands-on training facility.'

Our goal is to provide focused, intensive, professional development courses using hands-on training methodology to meet these needs. Classroom instruction followed by exercises and drills utilizing personal protective equipment in simulated response situations will significantly improve your skills and safety performance.

The Lynden Training Center uses course materials which meet or exceed emergency management, emergency response, environmental, safety and health laws, statutes, regulations and standards.

*We offer a better all-around product to our customers through industry-proven best practices supported by real world experiences, realistic training props and the Lynden family of companies.*

## Customized Training

We customized our training to your company and personnel needs. Our courses are designed to meet relevant regulatory requirements and can add industry best practices. We can utilize your Emergency Response Plan and company specific procedures to develop course material that will be relevant to your specific needs.

## Real World Experience

Our team of instructors have a wide range of industrial (oil and gas, transportation, refining, and military) and emergency services experience, including:

- Process and terminal operations
- Transportation operations
- Health, safety, security and environmental
- Municipal and industrial fire departments
- Specialized rescue teams
- Hazardous materials response teams

# Transportation Compliance Courses

- ▶ HazMat Transportation Basic
- ▶ HazMat Transportation Recurring
- ▶ Federal Motor Carriers Safety Regulations
- ▶ HazMat Transportation by Air Basic
- ▶ Custom courses designed for you
- ▶ Refresher training available

## Hazardous Materials Transportation Basic

This 24-hour class instructs participants in the hazardous materials transportation regulations and how they apply. This includes information on hazardous materials, substances and waste in transportation. Specifically, we will discuss identification, classification, packaging, labeling, marking, shipping papers, emergency response information, placarding, and transportation requirements.

## Hazardous Materials Transportation Recurring

This is an 8-hour advanced class designed for those students with a working knowledge (practical experience) of 49 CFR 100-180. This class focuses on the regulatory updates and the effects they have on shippers and carriers. This class meets recurring training requirements under 49 CFR Part 172 Subpart H 172.700.

## Hazardous Materials Transportation Waste

This 24-hour class is directed toward the shipping and transport of hazardous waste in accordance with 49 CFR and 40 CFR. The class includes preparation of the hazardous waste manifest, packaging, marking, labeling and placarding.

**Our instructors deal with Hazardous Materials Transportation every day**

## Federal Motor Carriers Safety Regulations

This workshop is designed for motor carriers who must comply with the Federal Motor Carriers Safety Regulations, 49 CFR Parts 350-399. Students will receive instructions on how to prepare for and undergo an audit from U.S. DOT. Checklist will be provided.

## Hazardous Materials Transportation by Air Basic

This 24-hour class is designed to satisfy the minimum regulatory requirement of both ICAO and IATA hazardous materials requirements and standards for air shipments. This class will focus on “how to use” the ICAO Technical Instructions, with comparison to the IATA Standards, the relationship of ICAO and IATA to 49 CFR Parts 100-180. Students should have an in-depth knowledge of 49 CFR, Parts 100-180 to attend.

## HazMat Transportation by Air Recurring

This is an 8-hour advanced class designed for those students with a working knowledge (practical experience) of ICAO/IATA. This class focuses on the regulatory updates and the effects they have on shippers and carriers. This class meets recurring training requirements under 49 CFR Part 172 Subpart H 172.700.
