

**When you need  
innovative transportation...**

**Solutions!**

*“LTI, Inc.’s Milky Way division is a leading bulk-milk hauler in the Pacific Northwest. Every day of the week, trained, courteous drivers using stainless-steel tankers pick up milk from dairy producers throughout the region. No matter what the conditions, Milky Way delivers the most reliable service. We’re here to serve our customers, with sanitary bulk-edible transportation.”*

# Solutions tailored to meet your transportation needs:

## **INNOVATIVE FEATURES**

### ***Payload:***

## **BENEFITS**

*Milky Way's tankers are built in-house by Lynden Tank Co. to achieve payloads in the PNW in excess of 74,000 pounds. Fewer and larger loads drive cost out of the supply chain for the farms and the receiving plants. Best in class payloads help us to be very efficient users of fuel. Our equipment is also designed for optimum safety, stability, and operating cost.*

### ***PTO Milk Pump:***

*Milky Way's double tank-trailer configuration is loaded using a single PTO driven milk pump mounted on the tractor. Benefits include; single point hook up for full load farms, larger pumps that save time and quickly get the truck in and out of farms with tight pickup windows, and no dependence on (or danger from) 220V power at each farm.*

### ***Fluid Transfer System***

*Milky Way has received FDA review and acceptance (m-b-334) of our unique fluid transfer system. Benefits include; reduced shrinkage, B.O.D. loading, daily wash requirements and unloading time for the receiving plants, free-draining design characteristics and on-board sanitary air under pressure that protect milk in external hoses from excess temperatures, and official regulatory acceptance of this system for use across the United States.*

### ***Aseptic Sampling:***

*Aseptic sampling devices that are installed on each tanker allow for antibiotic and quality tests to be performed outdoors before trucks enter the unloading bays. Benefits include reduced time, cost, and congestion for the receiving plants.*

### ***Pneumatic Security:***

*A pneumatic latching mechanism is being developed to eliminate six bio-security sealing points on each truck. Benefits include improved safety, security, and reduced cost for the receiving plant.*

### ***Onboard Computers:***

*Our onboard computer system promotes safe and efficient driving habits, ensures compliance with USDOT hours of service regulations, and offers shippers a variety of load visibility and reporting capabilities.*

### ***Data Collection:***

*Milky Way is working with customers to apply handheld data collection solutions to the business. Benefits include improved accuracy, reduced administrative time, and streamlined information flow.*

### ***Quality People:***

*While we're proud of our modern equipment, we believe the quality of a business is determined by the quality of its people. Many of our support staff and drivers have been with us for over 20 years. We expect a lot from our employees and we offer them a competitive wage and benefits package. Our drivers, maintenance and support employees are drug tested, trained transportation professionals. Their safety record is outstanding.*
