

Industry Solutions: Global Health

Multiplying Capacity Worldwide

Lynden Logistics supports global health and humanitarian programs in some of the world's most challenging and fragile environments. We have extensive knowledge of global health operations in these regions, driven by an established network of transportation professionals who understand the critical nature of global health logistics. Ultimately, we help organizations successfully complete their program objectives by allowing them to focus on their core mission.

Our Areas of Expertise

- Worldwide Health Delivery Programs
- Rapid Response Mobilization
- Health Research and University Support
- Clinical Trial Cold Chain and Ambient Support
- US Federal and State Program Support
- UN, WHO, UNICEF and NGO Support

Your Global Logistics Partner

Through our worldwide network supporting ambient and cold chain shipments, Lynden Logistics provides total compliance, management and visibility of critical cargoes from the US, Europe, India, and Asia to programs throughout the world. We look forward to helping multiply your capacity worldwide.

Federal Government Services

Lynden Logistics contingency response and program support for USAID, CDC, and DoD health and research contracts helps combat HIV/AIDS, tuberculosis, malaria, Ebola, and the COVID pandemic in the US and abroad.

Cold Chain Programs

Our cold chain service successes include worldwide deployment of new technologies in vacuum applications that prevent loss of heat and cold and new product designs for durability and longevity during transport.

Mission Data

Assessing need and measuring program success are key to global health advancement. Lynden's expertise ensures that data instruments and battery power supporting global health operations are successfully deployed to your teams, anywhere in the world.

Support Tools for Impact

Our Global Health and Humanitarian services team proactively manages all requirements common to worldwide missions:

- Transit time options to and from all points (Air, Ocean, Truck)
- Project management – budgeting, consolidation, reporting and more
- Temperature controlled freight – cryo and ULT, frozen, chilled, and ambient
- GPS and mobile tracking – single use global GPS and Lynden mobile app
- Total federal (FAR/DFAR) and stakeholder compliance
- Duty/tax free clearance
- Risk analysis and route planning
- Insurance
